## Claim Rejections - 35 USC § 103

Claims 1-3, 5-12, 14, 15, 19, 20, 22, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. 6091058 (US'058) in view of either of U.S. Pats. 6003328 (US'328) or 5435322 (US'322).

Referring to Figs. 2-4, US'058 discloses a heater unit 3a, and a heater "cap" system which covers the unit as a whole. US'058 does not explicitly disclose a distinct tray element coupled to the cap. However, US'328, at Fig's. 1-5 and col. 8, lines 1-13, or US'322, at Figs. 1-4 and col. 2, lines 40-65, discloses a distinct tray element coupled to the cap. It would have been obvious to form or attach a tray to the cap of US'058, after the manner of either US'328 or US'322, to facilitate placement of the sterile cover structure and enhance its durability. Moreover, the intent of each of US'328 and US'322 to provide a sterile field requires that the cover be formed either as a single unit or of hermetically sealed components. Further a temporary "coupling" means to couple the cover to the heating unit would have been an immediately obvious adjunct to prevent accidental displacement of the cover. The "cap" portion rests loosely over the heater unit and hence allows an air gap, as recited in claim 22.

## Allowable Subject Matter

Claims 4, 16-18, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
